MFDA Webinar: The Importance of Working Securely From Home

May 20, 2020 @ 12:00 p.m. (EST)

As working from home has become the new norm, working securely should be a priority. Unfortunately, cyber criminals are not sympathetic to this crisis and cyberattacks have continued without interruption, targeting those who are unaware and unprepared. In continuation of the MFDA's cybersecurity initiatives, we have jointly developed a live 60-minute webinar with NPC DataGuard on the topic of working securely from home on Wednesday, May 20 @ 12:00 p.m. EST.

With a total of over 40 years of experience in information technology and data security, Larry Keating, President of NPC and Darren Mar, National Accounts Manager at NPC will guide you through:

- The importance of secure computing from home at this time.
- Some of the COVID-19 BEC (Business Email Compromise) scams you need to be aware of and what you can do about them.
- Best practices to securely work from home and some tools you can use to ensure you are connected and productive during these challenging times.

All Members are welcome to attend, however this webinar is to assist Approved Persons and small to medium sized Members. In order to increase cybersecurity awareness and preparedness, we encourage Members to distribute this bulletin to their Approved Persons.

To register, please complete the [online registration form](#) that will redirect you to the NPC website.

If you require any further information or experience any technical difficulties, please email Wendy Luu at NPC at wluu@npcdataguard.com.

Presenters:

Larry Keating, President

Larry is the President of NPC, where he invented and brought to market his industry's first secure managed endpoint computing solution. For eight years Larry served as the founding chairman of the Ministers' Technology Advisory Group for the Province of Ontario. He was also a member of the Chair's Advisory Council on e-Government, the first Ambassador for Privacy by Design for the Information & Privacy Commissioner of Ontario and served as a technical advisor to the Lieutenant Governor of Ontario for the Indigenous Computer Literacy Program. Larry is currently a member of the Investment Industry Association of Canada's Cyber Security Committee. He is a speaker and writer and has been a Top Ten Technology Industry Newsmaker.

Darren Mar, National Accounts Manager

For the past nine years Darren Mar has specialized in helping financial advisors and advisor offices secure their business and client data through a consultative approach to ongoing cyber resilience. With an emphasis on education, Darren works with advisors both in Canada and the U.S. His career start in technology was with an SAP consulting firm in the late 2000s, helping small and medium size businesses maximize their investment in SAP.
